Education

Shri G.S.I.T.S, Indore

B.Tech in Electrical Engineering

2023 - 2027

CGPA : 8.46

Experience

Infosys Springboard

Nov 2025 – Jan 2025

Artificial Intelligence Intern

Remote

- Led the technical development of a Computer Vision system for automated PCB inspection, achieving a 94% mAP accuracy across 6 defect categories.
- Collaborated with a cross-functional team to design a spatial mapping dashboard, optimizing coordinate retrieval to a 5ms latency for real-time manufacturing feedback.
- Spearheaded the integration of a batch-processing engine capable of handling 50+ images per session, significantly increasing the system's scalability.
- Standardized quality control workflows by developing an automated PDF/CSV reporting tool, resulting in a 70% reduction in manual documentation overhead.
- Acted as the primary technical liaison, successfully presenting the project architecture and outcomes to a senior review panel on behalf of the development team.

Edunet Foundation

April 2025 – May 2025

Machine Learning Intern

Remote

- Developed and deployed AI models for Machine Learning and Generative AI, improving prediction accuracy by up to 12% on real-world datasets.
- Designed and executed Cloud AI and NLP projects, reducing model training time by 20% through optimized pipelines.
- Collaborated with a cross-functional team of 5, increasing project delivery efficiency by 15% through knowledge sharing and coordinated efforts.
- Conducted research on AI trends and ethical AI practices, producing 3+ guidelines that were adopted across all ongoing projects.

Projects

AI Circuit Guard – PCB Defect Detection | PyTorch, OpenCV, Streamlit, Computer Vision

- Engineered an automated end-to-end computer vision system achieving 94% mAP in identifying 6 distinct types of PCB defects, including short circuits and missing components.
- Optimized image processing pipelines with OpenCV, reducing detection latency to 5ms per image to support real-time manufacturing throughput.
- Curated and preprocessed a dataset of 1,500+ high-resolution images, utilizing data augmentation to improve model generalization and robustness by 15%.
- Developed and deployed a user-centric dashboard using Streamlit, providing a 90% faster alternative to manual visual inspection processes for quality control teams.

Health Care Insurance Premium Prediction | Insurance Analytics, Machine Learning, Python

- Developed a health insurance premium prediction system to estimate premiums accurately for different age groups.
- Built Linear, Ridge, and XGBoost models and applied age/genetic factor segmentation to improve prediction accuracy.
- Implemented a two-model deployment strategy meeting business risk requirements, achieving 99.7% accuracy (0.3% extreme errors) for older age groups and 98.7% accuracy (2% extreme errors) for younger age groups.
- Visualized feature importance to identify key factors influencing premiums, providing actionable insights for business decision-making.

Credit Risk Modeling System | Logistic Regression, Random Forest, XGBoost, Financial Analytics

- Developed a credit risk classification and scoring system to predict borrower default probability and assign credit ratings (Poor–Excellent) using financial history, credit profile, and loan attributes.
- Built and validated models (Logistic Regression, Random Forest, XGBoost) with feature scaling, categorical encoding, and imbalance handling (SMOTE, undersampling).
- Achieved KS of 85.98%, AUC of 0.98, and Gini of 0.97, with 20% reduction in false positives, confirming strong discriminative power and improving loan approval accuracy.
- Visualized feature importance to highlight key risk drivers, providing actionable insights for credit policy and lending strategies.

Technical Skills

Languages: Python, Java, C, SQL
AI & Machine Learning: Computer Vision, Deep Learning (CNNs), NLP, Supervised Learning, Statistical Modeling
Technologies & Frameworks: PyTorch, TensorFlow, Scikit-learn, OpenCV, Streamlit, NumPy, Pandas, Matplotlib
Developer Tools: Git, GitHub, Linux (Ubuntu), VS Code

Achievements / Certifications

- Kaggle Competition (NLP): Ranked 138/541 (Top 25%) in 'Natural Language Processing with Disaster Tweets', predicting real-time emergencies.
- Kaggle Competition (NLP): Secured 6/24 (Top 25%) in 'Contradictory, My Dear Watson', detecting entailment in multilingual text using TPUs.
- Selected for Amazon ML Summer School 2025 (3,000 students selected from 60,000 across India).
- Amazon ML Challenge 2025: Ranked 688 out of thousands of teams nationwide; developed a machine learning solution for a large-scale industrial dataset under time-constrained competition settings.
- Organized and coordinated events at Ayaam, the annual fest of SGSITS Indore, ensuring smooth execution.
- SIH Finalist representing SGSITS Indore at the Smart India Hackathon.
- Awarded NSS 'B' Level Certificate for active participation in social service and community development.
- Completed 'Introduction to Machine Learning' by NPTEL (Certificate)
- Completed 'Python for Data Science' by HackerRank (Certificate)

Positions of Responsibility

NSS (National Service Scheme) — Documentation Secretary	July 2024 – May 2025
* Managed official records, reports, and event documentation.	
* Oversaw content creation, editing, and publication of the NSS newsletter.
